provides precise servo arm neutral positioning if rotating the servo arm will not allow the desired servo arm position. Go to Travel Adjust menu. Go to reversing SW menu. Select channel. Travel Adjust. Change value. Reset selection to default (Adjust to 0). Accessing the Sub Trim Function 1. Flaperons allow each aileron to be independently adjusted. SWITCH SELECT 34. Pilots who insist on standing away from the group endanger their own models as well as those of the other pilots. 4 Safety notes. Pre-flight checking. If there are several modelers at the site, check carefully with all of them that you are the only one on your channel before you switch on your own transmitter. If two modelers switch on transmitters on the same channel, the result is interference to one or both models, and the usual result is at least one wrecked model. Before you switch on the receiver, ensure that the throttle stick is at the stop / idle end-point. Always switch on the transmitter first, and only then the receiver. Always switch off the receiver first, and only then the transmitter. If you do not keep to this sequence, i.e. if the receiver is at any time switched on when „its“ transmitter is switched off, then the receiver is wide open to signals from other transmitters and any interference, and may respond. Program MIXing 323. V-tail equipped aircraft require two servos. Connect left servo to the aileron port of the receiver. Connect right servo to the elevator port of the receiver. Accessing and Utilizing the V-Tail Type Selection 1. A higher rate, or travel, yields a higher overall sensitivity. You may find it easier to think of the Dual-Rate function as double-rates or half-rates. The amount of travel is adjustable from 0-125% in 1% increments. The channel name appearing first is known as the “master channel” or the channel to which you want to mix. To decrease the throw rate, move the cursor to the D/R position using the Select key, then press the (-) key. 26 Sub Trim..... We take no responsibility for the validity of the information available in each manual nor do we have any affiliation with the brands nor their products. Servo Travel Screen Page 17 System mode To enter the System mode, press the Down and Select keys simultaneously, then turn the power switch to the ON position. The Normal position should be used as the hover throttle curve. To access the AUX244 System Mode 3 Servo/120° CCPM (Graupner style, most popular) 3 Servo/90° CCPM Page 45 Approved operating frequencies, available crystals, frequency pennants This situation in your own country. TRAVEL Adjust 5. Hnízdil Letecká 666/22 CZ-16100 Praha 6 - Ruzyne (+42) 2 33 31 30 95 Wir gewähren auf dieses Erzeugnis eine Garantie von This product is warranted for Sur ce produit nous accordons une garantie de Die Fa. Graupner GmbH & Co. KG, Henriettenstraße 9496, 73230 Kirchheim/Teck gewährt ab dem Kaufdatum auf dieses Produkt eine Garantie von 24 Monaten. Connect the right aileron servo into the aileron port (AILE) of your receiver. 5. Check to make sure that the wing servos move in the proper direction. Remember that it is a trim convenience function. Be sure to use only genuine matching GRAUPNER connectors of the same design with contacts of the same material. FLAP SYSTEM 20. Place the transmitter switch in the ON position. 2. Access the Function mode by pressing the Down and Select keys simultaneously. 3. Press either the Up or Down key until the REVERSING SW appears in the upper portion of the LCD. 4. Using your transmitter’s control sticks, switches and potentiometers, move the control surfaces on your aircraft. MODEL TYPE & Data reset 28. Press either the Up or Down key until TRAVEL ADJ appears in the upper portion of the LCD. 4. Using your transmitter’s control sticks, switches and potentiometers, move the control surfaces of your aircraft.
